First sent message,

I'd hate to bother you this this but I found this to be really disturbing. I was noted that renguard doesn't completely protect against cheats. This isn't the problem. Today (12-28-06) at approximatly between 1:20am and 1:45 am I was shoked. Fighting in the city while in the nod ref. The perveiously mvp Mono used 2 remote c-4's on the master control while and orca attacked from outside. Mono then went out side and came back to trow two more c-4's. The went outside and came back to throw another one? This I know is not possible but when explaining this to the mod (Brandon@IRC) he told me he wasn't then consistantly told me to stfu (shut the fuck up) and to drop it. I told him I wanted him to understand what I saw cause Mono was the only one to come in the building, then I got q-kicked. Coincidentally, The begining of the next game I was unable to use the purchase turmanal but was able to use it again when I told them about it. Now (ethenol@IRC) was host. He didn't seem to have much of anything to say. He listed to me and tried to help me resolve it. I told him I was going to write to you because I felt it was wrong and the EXACT response was, "Go ahead and write to crim and see what happens. I couldn't beleive it, I played renegade for years and I get treated like garbage. I really would like it if you would atleast warn them because I host that behaves like that is just not right. Thank you for your time, Sincerly, Tim

So I went back into the jelly server and told Brandon that I reported him and Liquid something that I guess was the host said ROAR! and I was kicked. And banned. If this is why I bought this game than I quit and will be talking to the 5 people that I got addicted to this game and will have them do the same. Thank you for your time! Tim Moran

Response from Crimson

I don't know what you want from me....

So I buy the product and can't play it because I get banned. On top of that, I get yelled at by host and told to shut the fuck up. I would like it if I could be unbanned and if something could be done about these hosts.
