I just downloaded 3.1.3 and tried it out. I am only getting one error, which i'm not sure if it's the alt-tab crash. When I minimize the game, it is still displayed in the bottom bar, however if I attempt to restore it, the game shuts down.

All texture issues, including the barracks metal and GT sandbags have been fixed for me. Only thing this needs now is anti-aliasing and anisotropic support

Here is my crashdump for the crash I am getting.
