We are not fixing bugs in 1.03 (which is actually 1.031) RG 1.04 is all new code and it is THE fix
At most we considered releasing a 1.032 that was basically the current RG client, except with
SVKP removed, which would allow win2k and 64bit users to use it, but we have recently
accelerated our work on 1.04 by so much that we expect to have it out soon - soon enough that
we don't want to bother people by pushing out a 1.032 and then 1.04 a couple weeks later.
