---

I made this rifle allong sometime ago, To tell you the truth why it was so bad, because it was my second thing i did in my second animation (yes the days of my newb) and before I just had it private and I decided to release it public one year later. That is why the file is so messed up.

I now at the point where I'm redoing it because im not menitally attach to it.

So After I do the m16 I doing this Changes:

1. Going to redo the animation by scratch, I'm going to have cleaner animation then before.
  2. Fix the improper "reload runaway"
  3. More realist reloads.
