
Subject: Different Telnet information than normal.

I was fiddling with Telnet and decided to connect to my parents computer which houses the router. Upon connecting I got prompted for a username and password, so I just guessed and it connected. Now this isn't what Telnet usually looks like when connected to a local computer on the network, so I am curious if anyone here knows if this is Telnet on my router or is it Telnet on my ISP's end?

Here is a screenshot of what the connection information looks like:

The screenshot shows a terminal window with a blue title bar. The text inside the terminal is as follows:

```
BusyBox on dslmodem login: [redacted]
Password: [redacted]

BusyBox v0.61.pre (2004.07.16-20:31+0000) Built-in shell (ash)
Enter 'help' for a list of built-in commands.

# help
