ok in the latest version my load time is MASSIVE (i uninstalled for a while and reinstalled, but i went from an early version to the newest one) (6 - 11 mintutes) so naturally i cannot play online (the kick if over three minutes thing) it freezes under the personal ion cannon that sydney is holding for a long time (it does it offline to) then continues to tell me ive been evicted from the game for the following,

host eviction
or
server disconnect

ive tried everything! is there a way to fix the problem??, i checked my comp out with the renegade online requirments tool thingy and im 789% over the min requirerments, i want to know if anyone else has the problem or the answer, HELP!!! its prevnting me from doing what i bought the game for!!!
        could i be because i dont have all the patches or does 1.037 contain all the patch info?
        before i reinstalled it and had all that good crap in my system it played great i personally think its the new version but thats why i want to know if anyone else has this problem

im running
Windows 98
749 MHZ
389 MB of RAM
DSL
64 mb 7500 LE ATI Radeon
(im not to sure about the drivers but i just got the card)
anything else you need to know?
