I heard the same...Halo PC has been on my mind for a long time now. But I heard that it demands a solid comp. Is this true?

If it is, then I need to upgrade my rig big time.

I can run it fine with a 3.4Ghz Sempron (OK, that's 2.4Ghz then), 1.5Gb of RAM and a GF6200. Which reminds me, I need to get a new graphics card.
