Subject: Timeout when connecting to XWIS with Renguard installed

After I ve installed the Renguard Beta 5 yesterday, I could not connect to XWIS any more.
Logging in to RG network works fine, but when I try to get the Renegade server list, it says "time
out". I dont get to the login box.

Then I deinstalled RG and it worked again.

After that I installed RG (the public version) and login was blocked again. So far I have to connect
to Renegade without RG which is sad

And no:
- no antivirus activated during installation
- no firewall blocking
- no wierd hosts file modifications

Sommehow, RG blocks my connection to XWIS. I dont know why but thats what I realise. Help
please?
