---

I play Renegade on my laptop and I have RenGuard installed.

But I can't get into Renegade without an active internet connection. It's says something like "Renguard can't connect" or something like that.

Is there a solution to this? Is there a way to disable RenGuard when I want to play the Single Player missions or Multiplayer practice so that it will open the game?

I don't have wireless for my laptop and there is no internet connection in my bedroom...I have to go to another room to plug the ethernet cable in. But at night, I play the Single Player or Multiplayer Practice and I can't because RenGuard can't connect and so it won't open the game.

Help please!!!
