If you run a 3rd party program it may not work... Try useing the button on your computer that says:

Print Scr
--------
Sys Rq

just tap that once go to: Start > All Programs > Acsessories > Paint

open paint up and press:     Ctrl + v

your screenshot should paste their.  Then Save it as JPEG or PNG and after that go to a image hosting site such as http://www.imageshack.us and Browse an Upload your photo and copy the link for Forums.  If tht dnt work then you should try running Fraps. it's Very simple to use when u think about it.
-----------------

Running Fraps:

1. Download it here: ftp://ftpfiles.ren-archive.com/Fraps 2.8.2.rar  (just copy and paste tht in a new window in your broswer)
2. Run it.

3. Go to the Screen Shot's tab.

4.and follow the directions.

It's all right their.

just have it running while you play and press F10 i think it is... to take a screen shot.

idk it says wht button u press in the screen shot's tab.
----------------
  Post back if either of theese work or fail.
