You'll see a classy wallpaper and my minimal desktop - the way it should be.

[http://www.thecodesmith.com/download/pictures/desktop \(17th June 2003\).gif](http://www.thecodesmith.com/download/pictures/desktop%20(17th%20June%202003).gif)

Does anyone else agree that it's really stressful having more than 1-5 icons on the desktop? I just find it stressful and i can't seem to concentrate with whatever i'm doing.

Ah well, just my two pennies.
