well, i cant exactly remember how i got there, but i was in the enemy base (GDI) and i was ontop of the barracks in city_flying. Someone was on the floor repairing an Orca and i was ducking down with about 10 health. So, i did one of those Sloooooow motion runs to the plane, jumping up and down and managed to get in. I flew up and down squashing the engineer and owner of the plane and flew off the repair in my own base
