Thank you very much, Goztow! I am also sorry for this late reply.

OK...I have Windows XP SP2.

This is what RG does...it tries to get update and it downloads the updates and that's it:

I took this SS because it does it very quickly...as soon as I took this shot, the green RenGuard site information comes up and nothing happens after that. I even waited to see if it will update but no. I clicked on "Options" and the CP updates are enabled.

The Core Patch 2 does not download.

If you need more information, please tell me...I will reply immediately.

Thank you for helping.

PS: I noticed that the OB makes the new sounds (that comes in CP2) in Multiplayer Practice.
