---

Renewiki.com for scripts.dll for servr  
Nightregulator at Nightregulator.co.uk (I personally like NR better than the rest because of it's features)  
cp1 can be downloaded with psufan's installer  
Maps.....get them with cp1, or download them from ren-archive.com (they have every map EVER)or download the mappack posted earlier....

and nto normal? how is it not normal? 80 percent of all servers run cp1 or ssaow with nightreg or brenbot or Cloudy, and have new maps....not like terrace, but walls flying and stuff. all of these files will just make the server a normal renegade marathon/aow.
