As a matter of fact I made the .lvl file the other day to walls flying and Ironwarrior was kind enough to add it to game-maps for me. To be honest with all the spamming of http://www.game-maps.net I do on the tutorials I can't believe you didn't look there.

http://www.game-maps.net/index.php?action=file&id=787

If I have some time later today or maybe tomorow I might add city flying too.
