ST3ALTH wrote on Thu, 14 June 2007 18:48NR is not part of the FDS, its sort of like a plugin, you dont need it, and its not coded in the FDS.

By the way -- you have to reinstall NR, there are weird bugs that popup and fuck your NR over, and no way of fixing it, sorry.

dick

check your debug.txt for the full info on what causes that error..

basically you have your remote admin password as something REALLY Common and the message that is being blocked... contains your admin pass!

for example if your admin pass was 'a' and you sent....

'msg Nightma12 is a fucking wanka!' - then it would get blocked for being malicious as the remote admin pass is contained in it

blame WW..... if NR dousnt block it, it just dousnt get sent. i trhink its better this way as you know sommins going wrong
