The plan is that I will show the members of the team what information is available, access to the raw data that we've collected in the beta test, and we will debate and argue and carry on about which are the best indicators of skill, how to weigh them, etc... it will be a rough process, I think, and not for the faint of heart. But it is a task that must be done and I believe it is important that there be as close to an unbiased mix of people as we can get so that no one member can manipulate any situation to push their opinion on others.
