i have split your post from the main topic

1) please do not bump 1 year old topics

2) that is absoltely NO help to me what-so-ever. When you get an error... NR outputs loads of debug information that i will need. It would also help if you was to give me how you got this error

3) if this was over at the NR forums, this topic would immedietely me locked. As we have a new rule now that if you are going to ask a support question, you must ask it in a 'smart' way.

Please up read on this URL: http://www.catb.org/~esr/faqs/smart-questions.html
