Then the RIAA will produce something that stops that, then the 1337 will produce something that circumvents that.

It's a neverending cycle that the RIAA can't win.

Sounds a little like RG....

Meh, it'll be circumvented i guarantee ;P

Sounds like anything that the makers don't want bypassed.

Ontopic - The ISP's should not have to "fight" piracy (presumably, one "fights" piracy by employing ninjas...). If a company wants whatever it's making to be kept private, don't go near the internet.

Oh... and... ... Thugs at the RIAA...
