type
then mistype it as

and then he leaves then PM's me saying he has proof on video I use *cheat name removed*because i wouldnt type a captial D....in the ":D"

Um, every single shot from your pistol was HS, you said a simple ":D" test and only tpyed ":d". You were extremely crappy with tanks and everything else, see here:

Debate what you want here, Ill let you have that chance. Heres also a few things to consider. This took place in demons marathon serv, no core patches, no renguard, no biatch. Ive played with frost before and his vech skills are as poor as always, but his pistol=MUCH better over night? He was pistoling me better than most cw.cc players and if I didn't wall hug he would have hs'd me 12 times and I would have died in 1 clip. I dont think so. Why would he argue to come test then only type ":d"?
