## Subject: Re: Default Renegade Game Port + RemoteAdmin Port

Posted by xTc on Mon, 23 Jul 2007 23:27:53 GMT

I thought 4848 was the default port just for GameSpy?

We're using WOL, which I thought the default port was 2256.

I tried hosting a WOL server, and typing netstat -an in CMD shows 2256 being used up.

When I changed that to GameSpy, I did a netstat -an and port 4848 was being used up.

If I want to get the default port for WOL, should I be using 2256?

Thank you for your response!
