1. check if firewall doesn't block the process (be sure windows firewall is off)

2. Can you copy-paste what's in your c:\windows\windows\system32\drivers\etc\hosts - file (open it with notepad)?

Edit: seems xwis was down (read http://www.renegadeforums.com/index.php?t=msg&th=25722&start=0&rid=4 882) so it might just have been that.
