Sorry guys for posting this again, but it seems everytime i create a post that is related to the servers i run, some mods of kams server are posting Messages Non Related to the topic, maybe this will work...

Im in the progress of making the Mission Maps so they are AOW supported, but i have Huge Problems to make Actual Working buildings on them (main objective in AOW). is there anyone that could help with that? (ps. this is a post to all renegade players except the Flaming Mods of K... Server)
