Subject: Re: Microsoft has a backdoor into XP and Vista systems
Posted by Speedy059 on Sun, 16 Sep 2007 07:56:12 GMT

I just had my computer automatically updated without my consent. I was in a middle of a couple projects and the next thing my Windows Vista machine restarts saying "Configuring Windows Updates". At first it scared me thinking that I just got a virus or something... What bothers me even more is that whatever they did isn't in my "Updates History" viewer...
