Well, there's always one way of solving the problem.

(Fine, I admit it, I did it because I love the wallpaper...)

iGoogle   Command and Conquer:...

Microsoft targets consumer education, getting them to buy products from them instead of cheap copies,
targetting).

They will always be able to do anything they like to Windows - of course they have this in there. But they
system. The EU fined them upwards of £300million just for "restricting" consumers to Microsoft software.
breach of privacy laws - it just wouldn't happen. This is why I'm alright with it. Yes, the method is wrong,
information about what you do/have on your computer is sent.
