I said there were VIS errors. There are few here and there. But it was either release it now with ones that don't really affect the game much, or release it in 3 days with the possibility of having to wait even longer after that.

EDIT:

OMG, There is some people I forgot to thank in the readme!

-The mod team of APB, for supplying some of the textures I used.

-The maker of the Construction yard models (I'm sorry, I don't know your name)
