I have decided to make 1 last topic that i will post all my problems etc because i have been on this site for like 3 weeks and posted about 49 times . i do not like spamming and neither do others->

So anyway, where and how do i obtain GMAX, it is considered vital in some things i wanna do like (making my own security doors) etc. Now please there is like 500 versions of it, which one is the best and most reliable version?
