Yrr wrote on Sat, 06 October 2007 19:58XCC Mixer never worked for me - freezes on startup.
For Renegade I'm using RenegadeEx, which works quite fine in most cases.

For RenegadeEx it works really well. For the xcc tool it freezes when it startups because you
need to give it time. When it start just let it sit there so it can find all of you Westwood/EA games.
Then it will not freeze. The next time you use it it will load a lot faster.

Hope this helps.
