bigwig992No, but you can make all your text bold. Look for the style note pad thing in the data folder. Read through is and I think you can set your own font you want, but I didn't test it. It said something about Bold:0=False, 1=True. So I changed a 0 to a 1 and now I have a nice BOLD text for credits, times, scores, pages, announcements, player names, everthing within the game of play itself. It's pretty cool.

Sweet.
