A ton of people would exploit the method I said earlier (refill, toss, refill, pickup) and then they noticed one day they couldnt do so, because I was questioned if we fixed it...so this guy had to be cheating. Logs dont show any refill or purchase from him, plus if he is in the nod ref, he couldnt have refilled, and the c4 glitch is fixed people with original ren scripts cant use it, and people with 2.3+ can, he was also using original scripts because I saw no message saying "player blah blah blah is using scripts version #.#"

He was using proxys.
