Hehe. I've got two. This one, which is a pile of old parts turned into something useable, so we won't talk about it (Ok - 2.0 ghz Single Core P4, 1.5 GB of SLOW RAM, An aging HDD with but 40GB in it, Radeon 9550. God it's slow)

The proper one

P4D 2.66 Ghz.
1GB RAM
4 cheap 80 GB hard disks (SATA) in a RAID 10 (or 0+1)
ATI X1650
