I like my X-Navigator more though:
http://www.xoxide.com/aspire-x-navigator-black-black.html

Thanks, it was a waste in the sense 25% of cost was the BS PSU it came with that I threw out

I run 8x6 just because gameplay is better, at 1024x768 the names, radar and etc just get too small, I run all my other games at alot higher tho

The names, radar etc are too small? Ok I play at my monitor max resolution 1440x900 and I can see the names PERFECTLY. You play at 8x6 to get more FPS so your e-penis gets all big.
