Jecht wrote on Wed, 14 November 2007 10:38Why not VB? It meets his requirements for what he wants to do it seems like.

I have to learn C++ myself. Just can't bring myself to find the time though.
My main objection to VB aside from personal language prefernces is that you're locked into a Microsoft-based language.

If you're prepared to limit yourself to a single OS then it's fine, but I personally get annoyed unless I use something that is OS independent.
