IronWarrior wrote on Mon, 03 December 2007 22:23Hmm, was replying back to your message, then the forum died... am too tired to write it out again.

If LE is still crashing, then you might have added a script to an object with a missing value.

Put zero in any fields of the script that you don't use (keep in mind that one script can have multiple params, so always click the drop down arrow on params, or scroll the middle mouse button downward).
