I'm running a trial server that is 100% user maps, the standard Renegade maps are not even in the rotation. Currently it using v1.0 of the RenHelp map pack that will be required to play:

http://www.renhelp.net/index.php?load=Server&

(Server name: RenHelp.net Server pack 1.0)
It's just a trial for now, if it gets used I'll keep it around. Some of you might still care about fan maps and not all this server side stuff.

I am using BIATCH.

EDIT:

Also if you are playing and the server crashes please tell me the map so i can move it out of the rotation
