DeathLink6.0 wrote on Tue, 11 December 2007 14:33Yea it was the prototype wallpaper of my Renegade Wallpaper series (already postet this one here a half year ago^^).

This tank doesn't work ingame - it is not even made in Gmax/Max. This picture was rendered with Cinema 4D. Yea and even if you setup this tank for Renegade, you can't use it as a replacement.

So don't ask for a w3d - it doesn't exist.

Even so, that tank is AWESOME.
