Blue_Leader wrote on Thu, 17 January 2008 23:35i have a another question i have a geforce fx 5200 256 mb and im still getting low fps in 30+ player games i thought this game didnt require much on the video aspect why the low frames? is there any commands i could use to increase preformance i already know about command C i understand its not the best video card but it still should beable to play this with no problem right?

I get better FPS in newer games then I do in Renegade. The w3d engine for Renegade is pretty crap. Around 30FPS sounds about right depending on the graphics settings and resolution you are running the game at.
