I tried what Gitztow said i probably didn't do it right but i get the gist of it.

If this is what they are doing it doesnt speed the throwing speed up. What i watched people do in the past is a lot faster. They would stand by a pt and a steady super fast stream of c4 would shoot out.

If they are just doing refilling fast, and not increasing the c4 throwing speed. Then that isn't to bad i guess not like i could do anything about it anyways lol.
