---

I just found out how to get LE to work for The First Decade and made my first little map. I tested it and it worked. But then I tried to add a weapon spawner and it made me fall though map over and over. I made two new tiny test maps and the same thing happend all three times. At first it makes me fall... then it just makes me hang there and I can't do anything.

Can anyone help me with my problem?

It would be greatly appreciated.
