So basically, I think Dungeon Siege is one of the greatest RPGs made in a while. My only problem with it is this:

This happens to me every time I try to walk away from the Goblin caves, or, if I make a multiplayer game and start at the Bonepicker's Place and backtrack to the Goblin caves. It also happens in the Multiplayer campaign when trying to enter the 4th town, or the hidden Eastern Island.

The problem seems basic enough. There's a file that needs replacing, and I should re-install to fix it. The only problem is that I misplaced my CD a while back ago, so I re-install. I've looked online for the file with no success. Can any Dungeon Siege player upload theirs? This is my last hope, since I really don't feel like shelling out money to buy a game I already own.
