Subject: Core Patch 2 map files found
Posted by reborn on Thu, 28 Feb 2008 07:22:28 GMT

I had a virus on my PC a day ago, I formatted it last night and went to put in my back up version of winXP, turns out it wasn't my back-up version but my long thought lost back-up disk of old renegade files.
I found on the disk the .lvl files for the map fixes, including the fixes since CP1. I wanted these files a long time ago and asked if BHS had kept a copy that I sent to Jonathan, but he had also lost them...
If you want them, they are now available again. I might see if Iron want them on game-maps or something, I can't really see a CP3 coming out, but it migth be nice for people that make mods to there map to base them on the actual CP map fixed versions.
