17:45because you cant create / find a obelisk script?
No, because you're a freakin pretender.
You act like you know C++, but when it comes to Renegade scripts, it looks like to me, that all you
do is take original scripts, and edit them.
You keep acting like a freakin god, if you honestly know that much C++, if you honestly think
you're that good, then come up with something original and impressive, like a regulator or
anything! Maybe a anti-cheat!?

I myself don't know that much C++, but your bragging and showing off is starting to tick me off, no
one is impressed, no one is worshipping you, stop acting like it.
lol haha
