Tonight I was getting a friend set up for renegade. After awhile I noticed he was banned for "evasion" by ChewML.
He hasn't even played renegade that I know of. I have our PM's from your irc to kind of prove he didn't even know how to set up ren. Let alone hax.

Can you check into this...seems either an abused serial, or a mistaken bot to me.

Here's the attached irc logs of the channel n00bsrvr1 and our convo beforehand.
