Anyone has the textures for the orca lift truck below???? They were in one of the commandpacks, but isn't available for download anymore.

And I would be interested to know its "history"...

I guess, it was originally created by Westwood, but they don't use the model later. They made the SSM-launcher from it.

And the model was later used by the CommandMod?

So Genocide fixed or made it?

Because I found the statement from CommandoSR here in the forum:

Aircraftkiller: "Where is the orca lift Truck?"

CommandoSR: "Frankly said, the model got slapped and was turned in to SSM Launcher."

Herewith files:

- gmax without textures
- Original Westwood conceptarts of the orcalift
- Picture from a topic about the CommandMod-assets
