Subject: Re: Anyone "Tricking" here? Posted by EA-DamageEverything on Sun, 04 May 2008 15:49:44 GMT View Forum Message <> Reply to Message

Hey nice. I just started with very basic jumping techniques=

For the link thing, you have to blame it on YouTube. Every YT link we germans call will be prefixed with "de.youtube.com"/yxz since they started the localized versions of it. The only change what will happen for us is the german Frontend, all videos are stored on the same servers.
