holds the german Kraut flag high

You are all invited to come to my Frappr map and have a look via Google maps where we all live. The map is up since January 2006 because I asked myself the same. Now 600+ members and counting...

The big Renegade countries are= Germany, UK, USA, Canada and the "Land of the Dutch". Of course, some players are from other countries -therefore I created the flag skins for the main menu. Get them on Game-Maps or via the mod forum (Topic: Your flag in the main menu -would you like to have this?).
