I was just fooling around with game.exe. I used Resource Hacker to soo what kind of dialogs did renegade have and i have found a one that let you chose a Game Mode.
The picture is in the attachment on the bottom.
When i click one if them, nothing happens.
It would of be really realyl nice if TT could of made this, we dont really need all of them, but maybe 3 or 4.
Edit: reformatted the file from BMP to JPG
