So, this elite sniper was fighting us in Islands. 2v1...and he was doing good.

And the other guy was owning me bad. I asked him how he do it, I woulkd not even see him but he would be right around the corner...then we will get shot and die.

After finally asking him a thousand times, he said it was somthing to do with Zoom. But I have trouble understanding...how does it work?

He said it is super-fast with Zoom when shooting around corners....hmmm, I don't understand. It s asuper hugging trick when sniping.
