no, i have not been on anything that belongs to UN rules in years... and its not important where this was. i wasnt cheating or anything like that, just killed the wrong person too many times so he was pissed off.

anyways, i have reinstalled ren
and its still not working properly.

i can run game2.exe but not game.exe.

i cant change the properties on them to "run as administrator", which was told is critical component to make them work in vista.

now im asking for help, as i cannot figure out how to change it. the option is greyed out, but i am the admin on this computer.
here are some screen shots to explain the situation.
