You guys need to think about what your freaking out over. Renegade does not come with software that will "scan your computer". Whether this guy has his question answered or not he's lying if he says it does it automatically. You would need a client side mod.

If you don't have any computer knowledge please stfu and stop flaming people. I know it seems to be the trend on this forum but get over yourselves you don't need to be a part of every topic just to say random crap.

Well thats the end of my rant. Goodnight.
